I am an experienced Laravel and Vue.js developer with a strong background in web application development. I have successfully delivered projects that demonstrate Laravel's robust backend capabilities with Vue.js's dynamic front-end features. My expertise includes building scalable APIs, implementing responsive and interactive user interfaces, and optimizing web performance.

Experience

Freelancing

Apr 2020 – Mai 2022 | Remote

- Worked as a freelancer on Fiverr & Upwork specializing in developing and designing landing pages and websites, I've also received 113 5-star reviews from satisfied clients.
- Became a Top Rated Plus Freelancer (Upwork's top 3% freelancers) in Oct 2023
- Maintained strong client relationships, with many clients returning for repeat collaborations due to excellent support and communication

Sitenco – Lyon, France

Sep 2022 – Feb 2023 | Remote

- Joined Sitenco's team during the development of a significant project and played a crucial role in completing some decent parts of it
- I was responsible for developing backend modules and enhancing existing features to improve the project's functionality
- Was very good at transforming Figma designs into fully functional pixel perfect web pages using HTML, CSS, Bootstrap, JavaScript, and Laravel, ensuring a seamless user experience

247 Labs – Ontario, Canada

Feb 2023 – Mai 2023 | Remote

- Joined the 247Labs team as a backend developer, contributing to a web application project for a major insurance company
- Contributed to a web application project aimed at centralizing insurance management for a prominent global insurance company, I also took on the critical role of designing and implementing a robust API

Meto – Oakton, USA

Mai 2023 – Sep 2023 | Remote

- Joined Meto with the project in its final stages
- My main responsibility was architecting, optimizing, and ensuring clean, well-structured code in alignment with Laravel best practices
- Focus on scalability: tasked with preparing the project for potential use by over 100,000 users

Skills

- HTML, CSS, Less & Bootstrap
- JavaScript, JQuery & VueJs
- PHP, OOP, Laravel & Livewire
- Git, GitHub and Agile Scrum

Languages

- English (Advanced)
- French (Intermediate)
- Arabic (Native)
- German (Elementary)
